

# INDIVIDUAL PROJECT: GREEN INITIATIVE

## COVID-19 EDITION

**Project Deadline: Upload no later than February 25**

**Complete both Section 1 and Section 2:**

### Section 1

Complete **SIX** activities from Section 1. Include and upload clearly labeled pictures as evidence of activities.

1. Present virtually (via Zoom) to a local elementary or middle school about ways to conserve resources. Upload a picture of you presenting and a picture of an activity you conducted to teach the concept.
2. Conduct a year-long project that will positively impact the environment on your campus. Upload a copy a summary of your project and at least one photo.
3. Plant a tree. Include two photos of you and the tree. One pre-planting and one post-planting.
4. Organize a chapter viewing of a TED talk or other short documentary pertaining to the environment. This must take place at a virtual chapter meeting. Include a picture of the viewing of the movie.
5. Participate in, or organize, a clean-up day event in your community. Include a picture of you attending the event and a flyer promoting the event. This should be done following all social distancing guidelines.
6. Create a post or infographic on social media regarding a modern environmental issue. Upload a screenshot of your post and evidence of viewership by at least ten people.

7. Virtually visit a company or business that participates in or has created a green initiative ("green" rewards program, solar panels, etc.) Write a paragraph describing how they implement the initiative and its importance. Include a picture of yourself virtually visiting the business.
8. Invite a representative of an organization that promotes any green initiative to virtually talk to your local chapter. Include a picture of the speaker and a picture or screenshot of your communication with the professional.
9. Research one US President and write a 100-word paragraph about the environmental reforms they enacted and the political ramifications of their actions.

## Section 2

Calculate your carbon or ecological footprint and write a 100-word summary about how you will work to reduce your carbon or ecological footprint. Include a screenshot of your carbon footprint result.
